AP Pro
Rugged Outdoor Wi-Fi that Goes the Distance

Deliver fast and reliable Wi-Fi in even the harshest conditions with the AP Pro. The AP Pro's sealed, all-metal IP67 enclosure stands up to dirt, water, and extreme temperatures for years of dependable operation in industrial, public safety, transport, and other applications. Built-in PoE gives you more installation options and reduces deployment costs. And intuitive console- and cloud-based control makes configuration and maintenance simple for everyone.

Heat, Cold, Dust, and Water. All in a Day's Work.

The AP Pro is designed and manufactured with the strictest standards. Built from rugged electronics and tough aircraft-grade aluminum enclosure to seal against water and dust, the AP Pro handles just about anything the factory floor, construction site, or Mother Nature can dish out. The AP Pro can also withstand temperatures from -40° to 65°C, and it's protected against ESD and surges, so it stays up and running in conditions that would quickly shut down other access points.

TruePower Networking. Up for Every Challenge.

The AP Pro features our TruePower RF technology, which delivers maximum transmission power across all links at even the highest data rates. With TruePower, you get reliable, fast connections at distances that put other radios out of reach.

Onsite or in the Cloud.
Complete Control, Just a Click Away.

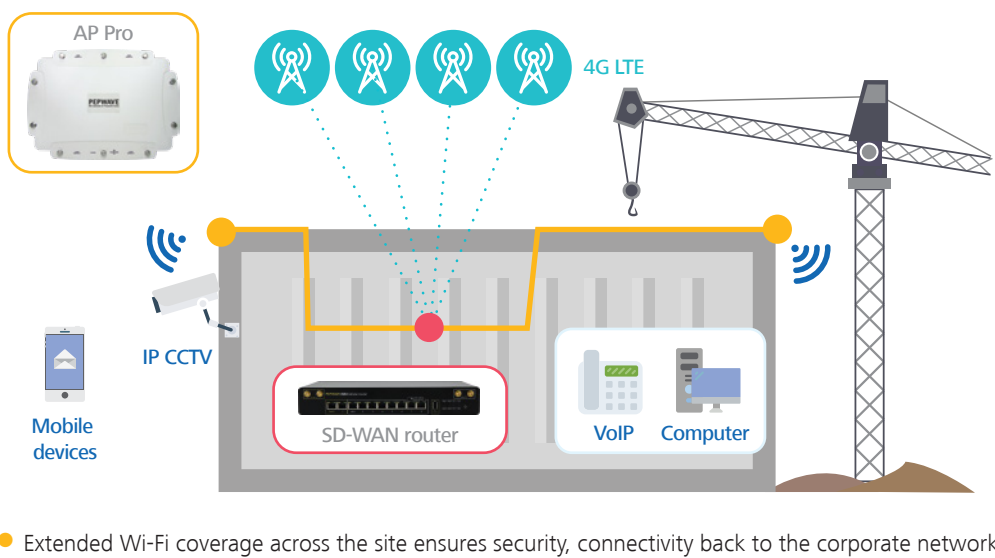

The AP Pro features Peplink's WLAN Controller for quick and simple onsite setup and configuration. Not onsite? Not a problem. Just open a Web browser and take control anywhere with our cloud-based InControl 2 configuration and administration solution.
